BATHTUBS

Over 25 Years Experience
IN THE BATHTUB INDUSTRY

About

The management team at Hydro Dimensions is comprised of leading innovators in the bathtub industry. Hydro Dimensions specializes in the manufacturing of Walk-in and Specialty tubs, as well as Custom Hydro Massage and Air Massage systems.

AN Innovative **INDUSTRY LEADER**

Hydro Dimensions' founders began their careers in the specialty bathtub industry back in 1983 designing hydrotherapy and specialty accessories for other bathtub companies. Their cutting edge innovations included the installation of Hydro Massage Systems on to tubs and accessorizing them with grab bars, faucets and lights. In 1993, they formed their own company and in 1996 became known as Hydro Dimensions.

In 2002, Hydro Dimensions teamed up with Safety Tubs to help design and manufacture the early model Walk-in Bathtubs. Those Walk-in Bathtub designs and Custom Hydro Massage Systems were so successful that they became the industry standard and are still being used by today's leading Walk-in Bathtub manufacturers.

Huge Selection **OF DESIGNS & OPTIONS**

Hydro Dimensions is proud to offer a large array of Premium Tubs and Walk-in Bathtubs designed to meet our customers' varying needs and lifestyles. Our products include 16 Gel-Coat Fiberglass Walk-in Bathtub models, 25 Premium Limestone Tub models and a variety of products and systems for upgrading existing bathtubs. Hydro Dimensions also offers several Custom Jetting Packages designed to meet unique customer specifications.

Customizable **PRODUCT DESIGN & PRODUCTION**

Hydro Dimensions can customize and produce any standard bathtub or Walk-in Tub on a mass production level. Due to our scalable manufacturing capabilities, product fulfillment is available for all market segments including small, medium or large retailers and wholesalers.

BENEFITS OF HYDRO *Massage* THERAPY

Traditional hydrotherapy treatment involves the immersion in water. Hydro Massage Therapy introduces soothing warm air, stimulating water jets, or both into your bath to massage your skin and muscle tissue. You should consult your physician before starting Hydro Massage Therapy. You should also consult your doctor or therapist if you are pregnant, recovering from an injury, surgery, or have high blood pressure. Avoid eating a large meal or drinking alcohol before treatment.

STRESS RELIEF

Hydro Massage Therapy has been shown to reduce physical tension and mental stress. Immersing the body in warm water may reduce the secretion of Cortisol and other hormones associated with stress. A study conducted by Washington State University's Bruce Becker, M.D., showed that soaking in a 102 degree fahrenheit tub for 25 minutes produced relaxation and a decrease in anxiety.

PAIN RELIEF

Hydro Massage Therapy sessions may help reduce chronic pain caused by Arthritis, Fibromyalgia and other conditions. The warm water improves circulation, which delivers oxygen and vital nutrients to muscle tissues. Water immersion also reduces the body's weight by up to 90 percent, taking weight off the limbs and joints. The water jets used in Hydro Massage Therapy may also provide healing benefits by massaging injured, tense, or sore areas.

IMPROVED SLEEP

Hydro Massage Therapy can help reduce insomnia and promote restful sleep. This may be because the body's internal temperature rises during hydrotherapy then drops afterward. The internal temperature drop prepares the body to get ready for sleep. Hydrotherapy can also improve sleep by relieving pressure on the body's joints and muscles, which reduces night time discomfort.

CARDIOVASCULAR REHABILITATION

According to Dr. Bruce Becker water immersion and hydro massage may be a useful tool for people who have heart conditions. Hydro Massage Therapy can increase the heart rate without a corresponding increase in blood pressure. It can also increase the efficiency of the heart's pumping muscles.

PROVIDES RELIEF FOR THESE COMMON AILMENTS

Arthritis, Lower Back Pain, Insomnia, Diabetes, Asthma, Bronchitis, Chest Congestion, Anxiety, Circulatory Disease, Stress, Balance Disorders, Varicose Veins, Hemorrhoids, Headaches, High Blood Pressure, Shingles, Colds, Stomach Problems, Joint Pain, Muscle & Nerve Pain, Fibrositis, Lumbago, Rheumatism, and Sciatica.

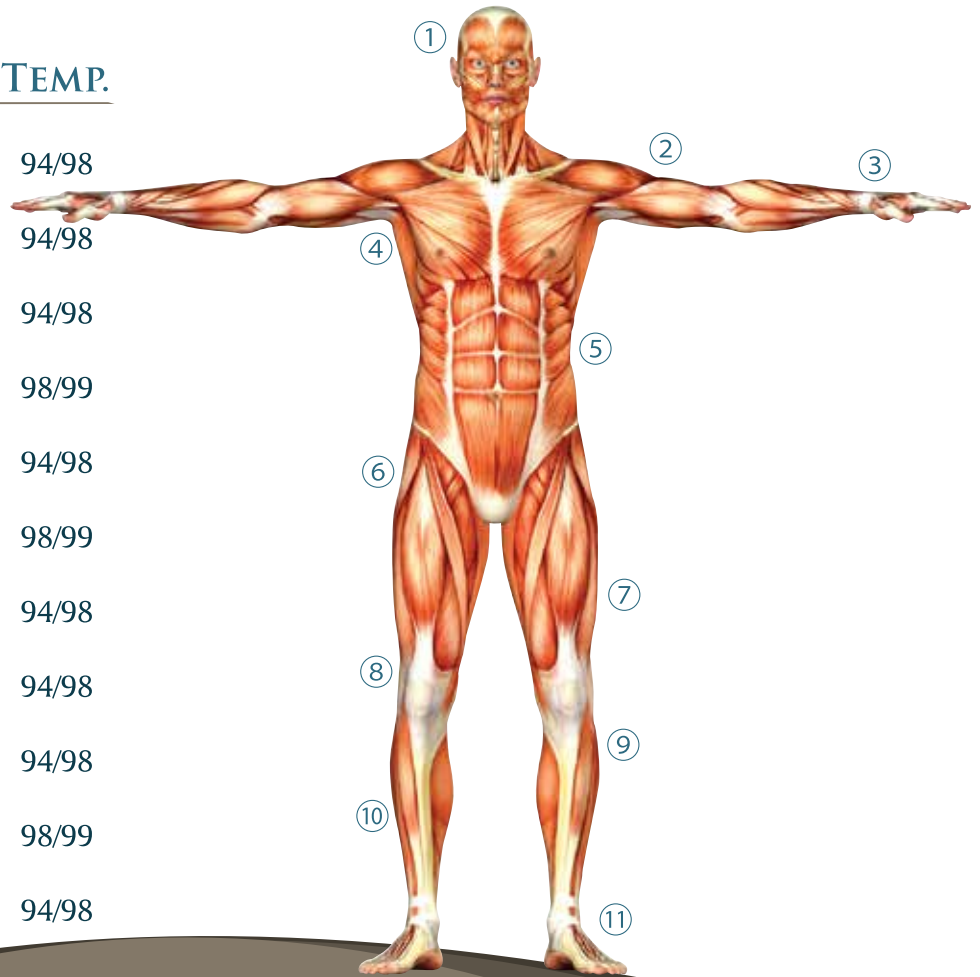

Relief OF YOUR COMMON AILMENTS

Hydrotherapy, formerly called hydropathy, is a part of medicine, in particular – physiotherapy, that involves the use of water for pain relief and treatment. The term encompasses a broad range of approaches and therapeutic methods that take advantage of the physical properties of water, such as temperature and pressure, to stimulate blood circulation and treat the symptoms of certain diseases.

Whether you are just enjoying a Deep Soak, Air Massage Therapy, or Hydro Massage Therapy, applying these schedules of suggested treatments will improve your day and overall feel. By following these simple times and temperature recommendations, you can relieve yourself of some of these common ailments.

AILMENT	TIME	TEMP.
① Mental Depression	15/20	94/98
② Fibrosis	15/20	94/98
③ High Blood Pressure	15/20	94/98
④ Lumbago	20/25	98/99
⑤ Rheumatism	15/20	94/98
⑥ Sciatica	20/25	98/99
⑦ “Run Down” Condition	20/25	94/98
⑧ Arthritis	15/20	94/98
⑨ Poor Blood Circulation	20/25	94/98
⑩ Varicose Veins	20/25	98/99
⑪ Strains/Sprains	20/25	94/98

According to a medical journal written by the American Medical Association, “[Hydrotherapy Baths] are particularly useful in two great groups of disease, infections both acute and chronic and various nerve disorders. Perhaps it is in the case of infectious diseases with toxemia and marked mental features that we find the best examples of the favorable results which can be obtained from the general hydrotherapy.”

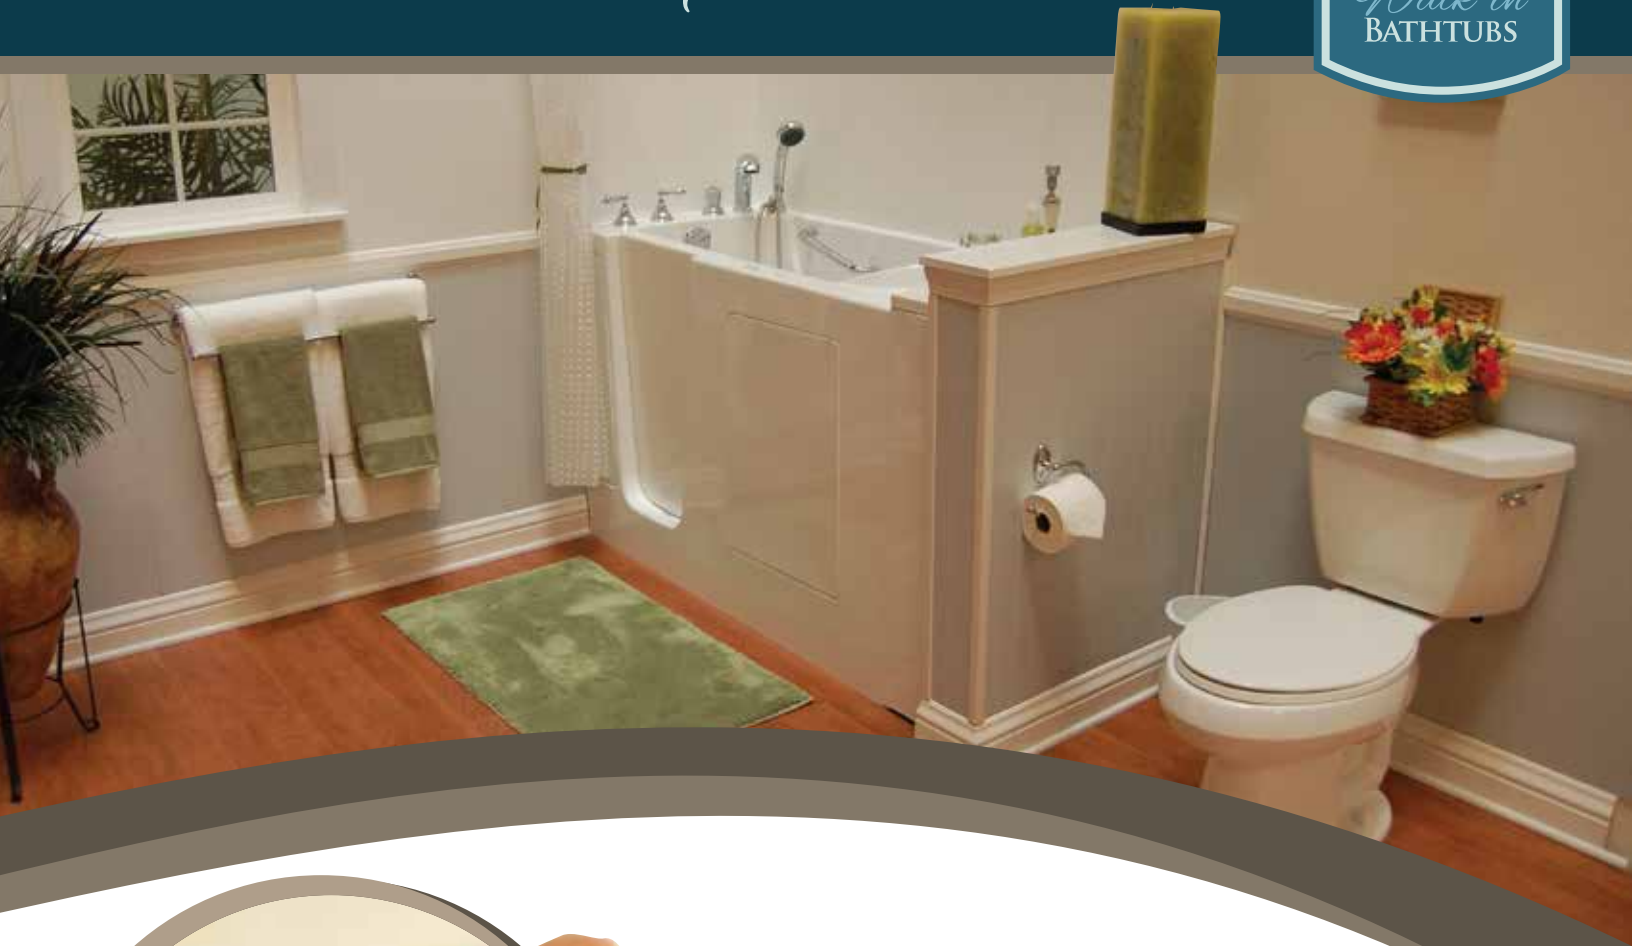

Our beautiful line of Walk-in Bathtubs will not only enhance your daily life, but also improve the look and feel of your bathroom.

MODEL HD 2645

DIMENSIONS: Length 45" x Width 26" x Height 39 ½"

Looking for a Walk-in Bathtub that will fit into a smaller space, look no further. The 2645 was designed with space in mind. Its flex door design also allows the bather to sit in comfort while closing and opening the door.

All of our Walk-in Bathtubs are available with options, including an air massage system, hydro massage, or a combination of both. You can also add an additional grab bar or upgraded fixtures. We only provide top of the line products with our bathtubs. Any option you want, we can provide and assemble at our factory.

MODEL HD 2653

DIMENSIONS: Length 53" x Width 26" x Height 36"

Here's the Walk-in Bathtub that started it all. The 2653 will fit easily through doors and hallways of the home, allowing for the installation process to run smooth and quick. This is a popular model for small homes and condominiums.

THE PERFECT *Healing* SOLUTION

Hot or warm water baths result in changes in the body that lessen pain or discomfort and accelerate the body's natural healing process. Specifically, warm or hot baths increased blood flow and removes toxins more efficiently.

.....

MODEL HD 2851

DIMENSIONS: Length 51" x Width 28 ¼" x Height 41"

Of all our standard size tubs, this one has the deepest tub well, allowing you to enjoy a deep invigorating soak, or therapeutic massage to most of your body. With an elegant design and clean lines it is also astatically pleasing in any bathroom setting.

There are many therapeutic advantages of a warm bath, which includes increased circulation and reduced joint pressure. You can enhance the benefits by adding an air therapy or hydrotherapy massage system to you Walk-in Bathtub.

MODEL HD 3048

DIMENSIONS: Length 47 $\frac{3}{4}$ " x Width 29" x Height 38 $\frac{1}{2}$ "

Another one of our popular tubs is the HD 3048 Model because of its convenient size (29" wide and 48" long) and easy maneuverability during installation. This tub provides the best of both worlds, a good soaking depth and a small enough footprint to install easily.

A Silent Pump System provides a safe and quiet environment by delivering energy efficient water flow while maintaining the warmth of the water.

MODEL HD 3052

DIMENSIONS: Length 51 ½" x Width 29 ¾" x Height 40"

The popular choice for all Walk-in Baths is right here. The 3052 combines size and function in one package. Its spacious interior size allows for maximum bathing room while maintaining a frame that allows the tub to be moved into its final position without excessive remodeling.

Soaking in our tubs will reduce your body weight as much as 90%, which helps reduce pressure on your muscles and sore joints. Our Walk-in Bathtubs provide a therapeutic environment to help you recover from a long day of physical stress. Combine hydrotherapy with our Air Massage System to get the ultimate in relaxation and recuperation.

.....

MODEL HD 3052W

DIMENSIONS: Length 51 ½" x Width 29 ¾" x Height 40"

This is our specialized transition Walk-in Bathtub exclusively made for people who face challenges getting in and out of a conventional Walk-in Bathtub. Featuring an extremely wide door that swings out and an easy-to-use handle to secure the door, this tub is among our top sellers.

All of our tubs have been fitted with the lowest entryway possible. This provides you with an easy entry and exit without having to lift your legs strenuously.

MODEL HD 3055

DIMENSIONS: Length 54 ¼" x Width 29 ½" x Height 38"

As an option for those needing a walk-in bathtub requiring a 2-wall installation. The 3055 has tile flanges on the long back and faucet side walls of the tub. A pony or flat wall can then be installed giving the bathing area that finishing touch.

THE *Ultimate* BODY THERAPY

HYDRO
DIMENSIONS
Walk-in
BATHTUBS

Cold water baths also result in changes in the body that can lead to the relief of symptoms. Decreased blood flow lessens the severity of inflammatory reactions, like swelling associated with injuries. A reduction in swelling results in less pressure on the nerves. This relieves overall pain and discomfort.

MODEL HD 3060

DIMENSIONS: Length 60" x Width 30" x Height 37 ¼"

This tub takes full advantage of your standard tub replacement. At 60 inches long it is one of our longest models, allowing you to stretch out while you bathe. So if you are looking for extra space to move around, and be comfortable during your bath, then this is the model for you.

Recent medical studies have shown that people who regularly treat their lower back pain with hydrotherapy experience a significant reduction in the frequency and acuity of pain. People experience less pain and as a result, are less dependent on drugs to control symptoms.

.....

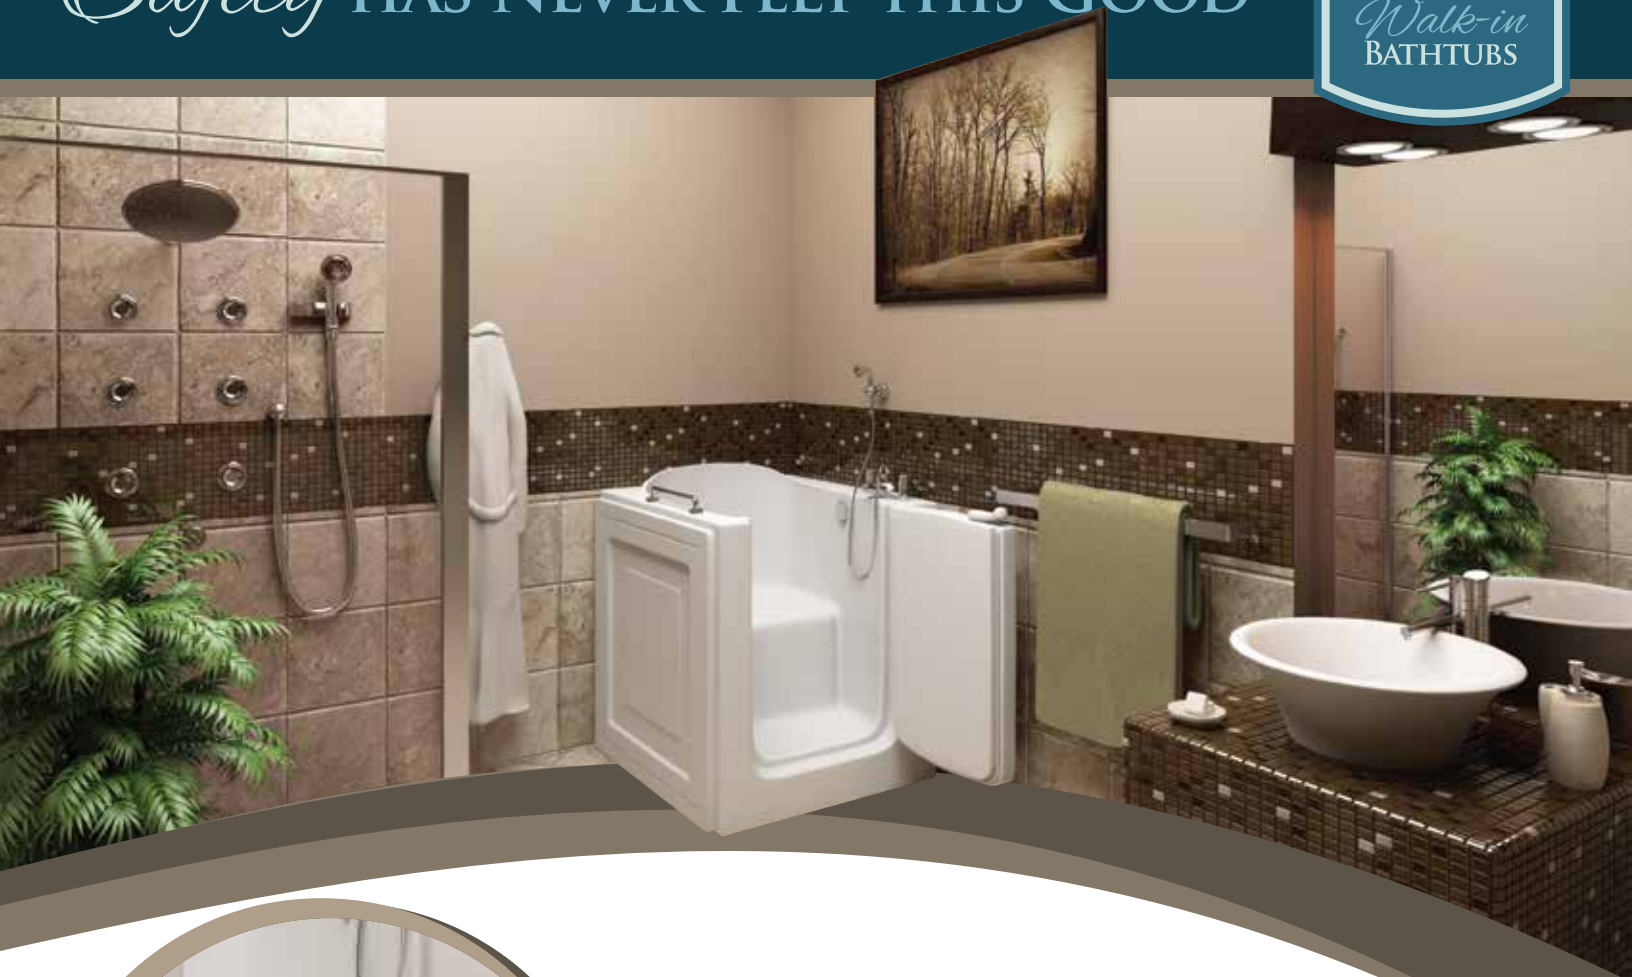

MODEL HD 3060-L

DIMENSIONS: Length 60" x Width 30" x Height 22"

While all of our other models have a built in 17" high seat, this model is made for the person that would rather lie down in the bathtub, but still have the advantage of a door so they do not have to step over the side of a conventional tub.

Safety HAS NEVER FELT THIS GOOD

HYDRO
DIMENSIONS
Walk-in
BATHTUBS

We provide beauty, luxury and accessibility to all of our clients. Our tubs feature a 17" high contoured seat that provides comfort and makes it easier for you to get in and out of the bathtub. All of our seats are ADA compliant and guaranteed to ensure you the best and most comfortable experience while bathing.

MODEL HD 3137

DIMENSIONS: Length 37 ¼" x Width 31 ½" x Height 38 ½"

This compact, free standing, outward swing door model is only 32" wide by 37" deep and features three finished sides so it can be installed almost anywhere. This unique size will allow the benefits of a nice soak but still offers all of the standard and upgrade features of the traditional Walk-in Bathtub.

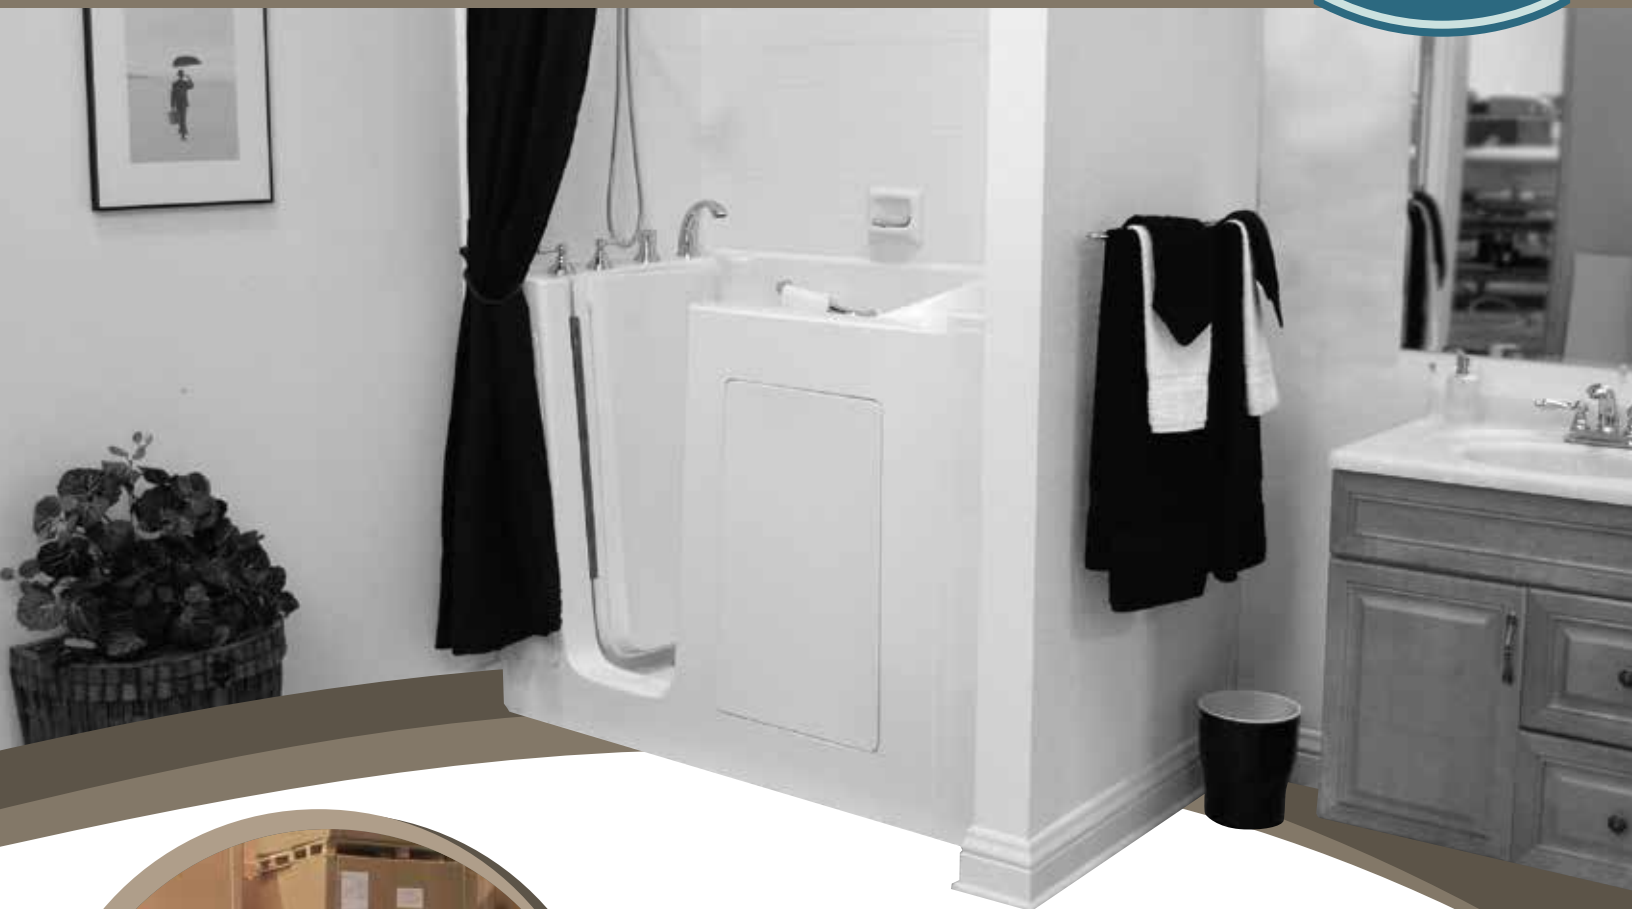

All of our Walk-in Bathtubs can be installed in an existing regular home bathtub space. This makes installation quick and effortless.

MODEL HD 3153

DIMENSIONS: Length 53 $\frac{3}{4}$ " x Width 31 $\frac{1}{4}$ " x Height 35 $\frac{3}{4}$ "

Simple yet practical, the 3153 fits into almost any unique bathtub location. The height of this tub makes it ideal for locations where a garden window is present, and adds class to any bathroom.

We provide the best Walk-in Bathtubs available in the industry. Our models provide the ultimate in accessibility and pure comfort. Every tub is assembled by hand in our U.S. based facility. From start to finish, we ensure quality every step of the way, in order to guarantee you the best product.

MODEL HD 3155-D

DIMENSIONS: Length 55" x Width 31" x Height 45 ³/₄"

This extra deep and spacious Walk-in Bathtub offers the ultimate bathing experience. The 3155-D allows for the flexibility to be installed in a remodel application while providing a massive 39" of soaking depth.

Soaking in a 102 degree bath before bedtime has been shown to relax muscles, decrease pain in tissue and joints, decrease stress, lower the amount of blood in the brain and promote a deeper, more restful sleep.

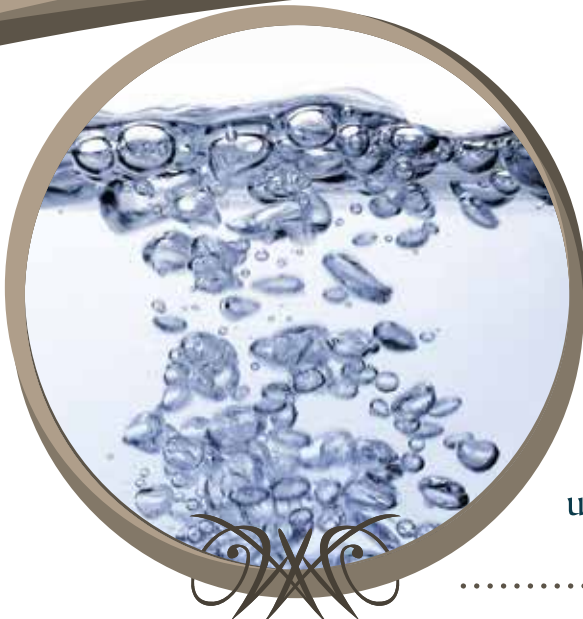

MODEL HD 3252-W

DIMENSIONS: Length 51 ½" x Width 31 ¾" x Height 40"

We specifically designed this bathtub to enhance the lives of those with limited mobility and want the freedom to get in and out of their bathtub with convenience and safety. The door on this model is wider than most, and swings outward to make getting in and out easy.

COMBINES *Comfort* AND SAFETY

HYDRO
DIMENSIONS
Walk-in
BATHTUBS

Getting in and out of a HD Walk-in Bathtub is simple and safe, even those with limited mobility can enjoy its therapeutic value and relaxing benefits. Once you're in the tub, the latest hydrostatic technology guarantees a watertight seal for continuous, trouble-free use.

MODEL HD 3260

DIMENSIONS: Length 60" x Width 32" x Height 36"

The 3260 was created for use in new construction or for a simple home remodel. This tub boast a 60" length to fill the standard size tub space. It is 36" deep and 32" wide from wall side to door side. All of this is wrapped up in an easily accessible, certified and reliable gelcoat fiberglass shell.

All of our bathtubs come standard with chrome fixtures, adding strength and beauty to the product. Every piece of hardware was specifically designed for each bathtub.

MODEL HD 3260-D

DIMENSIONS: Length 60" x Width 32" x Height 46"

Specifically designed for new construction where size is needed, this is our largest full size Walk-in Bathtub. The 3260-D will fit perfect into spaces allocated for a 60" in length by 32" wide bathtub, it will also allow the bather to take advantage of its full 39 inches of soaking depth.

THE *Confidence* TO BATHE FREELY

HYDRO
DIMENSIONS
Walk-in
BATHTUBS

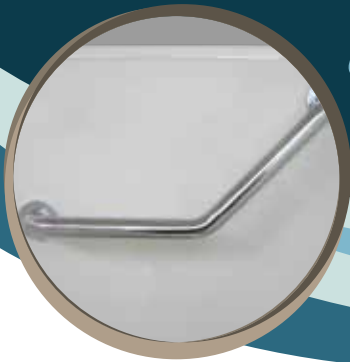

Hydrotherapy has become a staple home treatment for people with Type2 Diabetes, along with proper diet and exercise. It is also strongly recommended that people over the age of 40 without diabetes start enjoying an ongoing hydrotherapy regiment as a way to mitigate the risk of developing Type2 Diabetes as they age.

MODEL HD 3555

DIMENSIONS: Length 55" x Width 35 ³/₄" x Height 40"

If you prefer a wider seat and space to relax, or you are just in need of a plus size tub, this is the perfect model for you. At 35 inches wide it is the perfect tub for the person that requires, or just prefers a larger bathing area.

SAFE-T-DRAIN™ GIVES YOU ADDED *Security*

Our Safe-T-Drain™ offers two draining options, for added security when you are ready to get out.

① simply turn the overflow knob and the tub starts draining.

② lift the drain plug out by pulling on the chain and the tub starts draining.

In a controlled environment a typical 70 gallon Walk-in Bathtub was tested to see how quickly the tub would drain completely. The study was conducted using a **standard drain plug** connected to a standard 1 ½" waste pipe. The results showed that a 70 gallon tub would completely empty in approximately 220 seconds or 3 minutes and 40 seconds.

SAFE-T-DRAIN™ *Walk-In* BATHTUB STUDY

STANDARD 1 ½" P-TRAP

Drain plug open took **140 SECONDS** to completely drain. That is **36% FASTER** than a standard drain.

Drain plug removed took **130 SECONDS** to completely drain. That is **41% FASTER** than a standard drain.

STANDARD 2" P-TRAP

Drain plug open took **105 SECONDS** to completely drain. That is **52% FASTER** than a standard drain.

Drain plug removed took **85 SECONDS** to completely drain. That is **64% FASTER** than a standard drain.

CHOOSE THE RIGHT *Therapy* FOR YOU

HYDRO MASSAGE THERAPY

While soaking in the tub has so many health benefits, adding Hydro Massage Jets gives you even more. The warm and powerful

individual streams of water are easily adjustable to customize your bathing experience with either low or high water pressure. Hydro Massage Jets are placed strategically around the bathtub to give a thorough and vigorous massage right where it is needed. This deep tissue massage relaxes the muscles from everyday tension and helps eliminate accumulated toxins such as lactic acid.

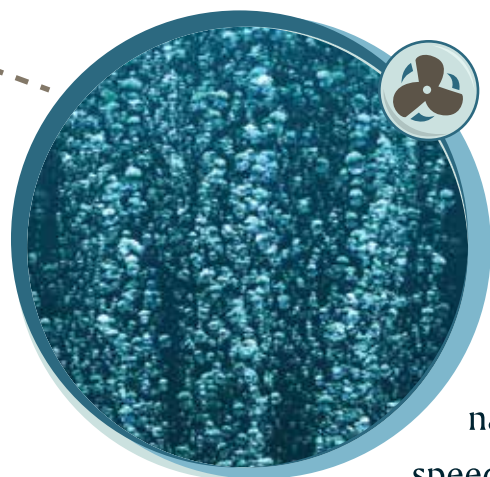

DUAL MASSAGE THERAPY

Enjoy the best of both worlds with the Hydro Dimensions Dual Massage Therapy System. This system combines Hydro Massage Therapy and Air Massage Therapy into one package. Leave the day's stress behind while enjoying the benefits of both Deep Tissue and Soft Tissue Massages, or enjoy each system individually. The choice can now be yours.

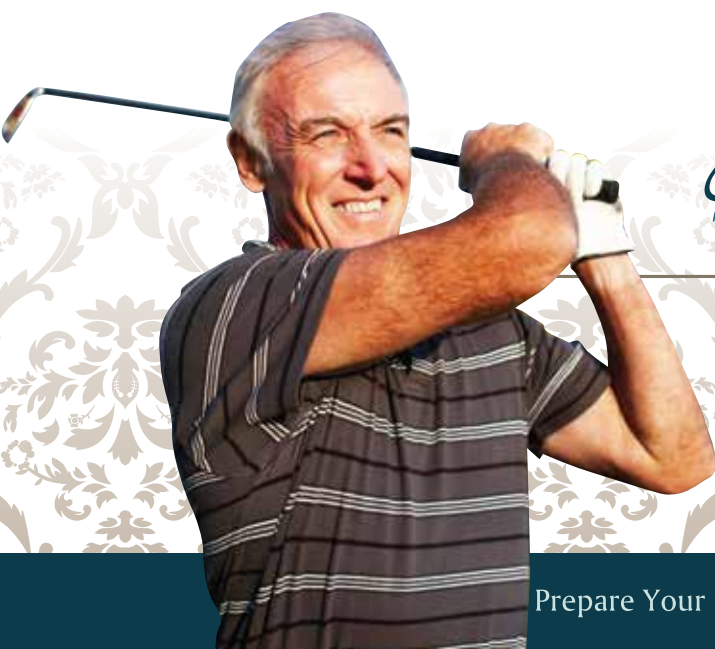

DEEP SOAK

Hydrotherapy is the way in which water, by simply submerging yourself in it, can help heal the body, mind and spirit. Soaking in a warm or hot bath can provide detoxification, stress-relief, and increased circulation among other benefits. It can also help with many health ailments such as insomnia and arthritis.

AIR MASSAGE THERAPY

An Air Massage System makes bathing more enjoyable by adding a soft tissue massage to your bath as a blower gently pushes warm air through multiple jets spread throughout the bathtub for the most calming and healing effect. These warm bubbles soothe the body while stimulating the production of natural analgesic hormones known as endorphins. The variable speed blower makes it completely adaptable to the bathers' individual needs, producing either a gentle caressing flow of bubbles or a more powerful stream.

Relieve
THE STRESSES OF LIFE

System OPTIONS

HD AROMATHERAPY

The aroma of the natural essential oil, when inhaled, stimulates the brain to trigger a reaction and releases naturally occurring chemicals in the body which provides a therapeutic benefit. Sit back relax and enjoy your bath while you are surrounded by the delightful fragrance that comes from our HD Aromatherapy System.

CHROMATHERAPY

Chromatherapy is used to balance a person's physical, spiritual, mental and emotional energy with our LED lighting the bather can create an ideal bathing environment. The combination of 7 basic colors and a choice of 21 blended colors will provide a relaxing bath, chasing away everyday stress.

UV STERILIZER

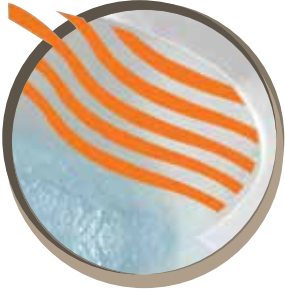

Ultraviolet light (UV) has been used for years in hospitals, laboratories, food processing plants and other public facilities to kill bacteria, viruses, algae, molds, yeasts, and disease causing micro-organisms. By adding this feature to your Walk-in Bathtub, you can take advantage of medical grade sterilization.

OZONE SANITIZER

Created from the oxygen we breathe, Ozone gas is a powerful sanitizer that is known to kill disease-causing microorganisms. Installed in line with our air system, the Ozone gas flows through the air system piping out through the air jets disinfecting the system while you bathe. This process of sanitizing the air system leaves no harmful by-products and quickly converts back to oxygen.

System OPTIONS

HD - COMFORTWARM™ SYSTEM

Heat coming directly through the surface of the bathtub wall surrounding the bather exactly where they need it. Now the bather can finally sit and enjoy warmth that will spread throughout the body even before the bathtub is full, during bathing, and while it empties, providing ultimate relaxation.

1.5 KW HEATER

Designed for the pressure side of the bathtub pump, and has a built in internal pressure switch to control heater on/off operation. Important: bathtub heaters will only maintain the water temperature that is put into the tub. They will NOT increase the water temperature.

CLUSTER JETS

Cluster Jets provide therapeutic, pinpoint pressure, up and down the back of the body. Grouped together in pairs of two, these jets are located on the back, or can be placed around the sides of the seat area. With a twist of the Air Flow Control, the pressure can be adjusted from vigorous to mild.

JET UPGRADES AND ADDITIONS

Classic Standard 2.5

HAND SHOWER SLIDE BAR

Adding a hand shower slide bar to your bath or shower area will provide additional comfort and ease of use for the bather.

TMV VALVE

Thermostatic Mixing Valves maintain and limit mixed hot water to a desired, selectable temperature. The TMV can be set to any temperature between 80°F and 120°F.

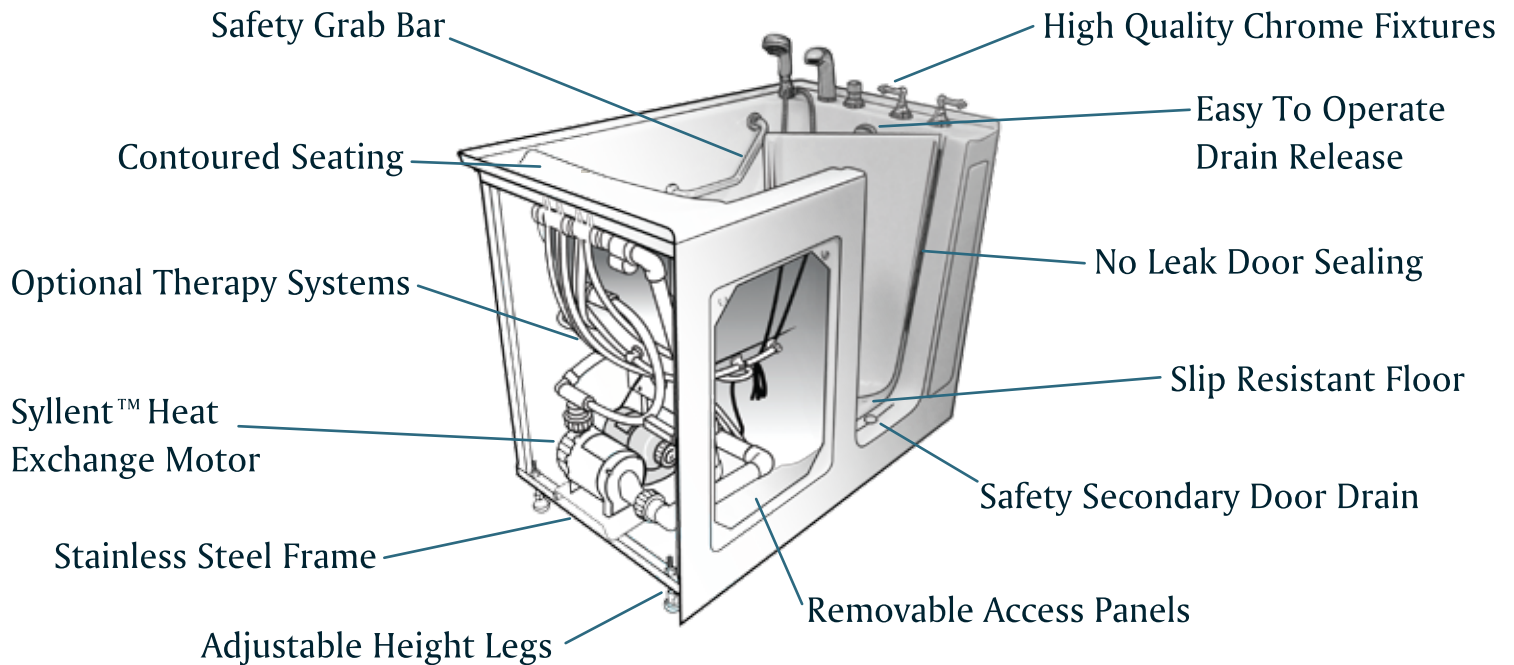

OUR *Dedication* TO COMPLETE *Certification*

IAPMO R&T and UL Certifications

All HD Walk-in Bathtubs are tested to IAPMO standards (International Association of Plumbing and Mechanical Officials), and carry the UPC Certification (Universal Plumbing Code) covering the tub shell. In addition, every system is UL (Underwriters Laboratories) listed, an independent product safety certification organization which covers the electrical portion of the Hydro and Air Massage Therapy systems.

Every Walk-in Bathtub and system are thoroughly tested under the premises of these certifications to ensure top quality, unrivaled by any other Walk-in Bathtub company. Hydro Dimensions offers a 10 year limited warranty on the therapeutic systems and a limited lifetime warranty on the frame, shell & door seal.
